The American Hebrew

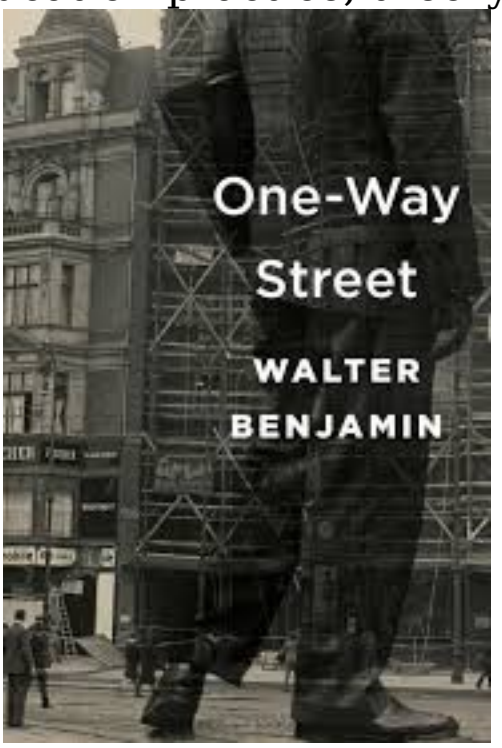
by Shomit Sirohi, Isiah and Isikiel

The process of deconstruction then proceeds with a reading of Nietzsche as well, as he formed a philogogical approach to education in his manifesto for society. He also compares it to the most important institution in society which then is fundamental for us to know according to young Prophet Sirohi – and so a musical piece based on this. The price of this newspaper is 20,000 Dollars again as standard price.

The American Hebrew argues for an Educational symphony to be explored – it is said that Torah means school life, and that then means culture – like in Hyderabad where schools were so important apart from co-operatives and its simple cultural locution of economics means that – just a school poem we thank you.

I. The American Hebrew with an Introduction by Isiah and Isikiel

And so in fact The American Hebrew loves to read the New York heritage as also finally about the Nobel Prize or even the bursaries for profound educational institutions, or even Wolfgang Schirmacher being about education practice, theory and institutions like



the EGS. Now it means that Jewishness is all about education and institutions, even David Adler is about this theme of his life and following education in the world. Moishe Postone is also in fact about the process of education and young students and conversations with teachers and collegues in the world including of philosophy.

We mean that Jewishness is explored as always as an educated class of intellectual people finally and this means it is about expressing that university life or college life and what Torah calls school naivity and life. We thank Sirohi for this perspective again.

II. Sirohi – Jewish Sticks and Educational Perspectives by Nietszche what he meant and is it correct to see it that way?

Listing Jewish dining and Jewish sticks with Nietszche and his view on symphony to life, and educated life, and music to a educated person as being tragedy while studying which is won by the music of finding a work like Hegel and Encyclopaedia in fact and understanding it – this then is the Golden Edition of Marx interpreted strictly – that the university culture and the intellectual class and its whole lifestyle is then a culture of education.

I. Jewish dining – customs in Chasadic culture – education in Nietszche was in fact accounted for by Scholem when he was young – he wrote an essay on the importance of education and education policy for Israel.
II. Further remarks – Education in Nietszche if divined can mean in fact what is called intellectual formation, class, and party politics and is in fact all that matters Nietzsche declared in his Gymnasium
III. Gymnasium in fact as Wolfgang Schirmacher would argue is such a view – it is the view that with philology man is educated and that is all that matters – said in a style and then backed up with a lot of material and cross-referencing.

Cross-referencing in Nietzsche's Gymnasium course reconstructed –

I. Education cross-references better.
II. Class of Intellectuals arise

III. College style arises.
IV. And Women fall in love with a Prophet
V. He is then in fact walking around with them and is asked – “What is education?” He answers “In fact how we become divine, and how we learn Torah truly and what makes us in fact not illiterate, but also what makes it like college style.”

Many cross-references of say film culture develops finance and companies.

Many works on retail make for tourism.

Cosmopolitan bars and sushi is then had after class – now think of this as Hegel.

Concluding Remarks by Gershom Scholem

In fact it is genius to think of my essay on Nietszche – yes I meant an education policy would become culture in Jewish ways. I mean it is genius to read this as all that means – even Wittgenstein argues for simple education.

The Torah of course just means school life in Rosensweig, in the Quran, Mohammad is praised for his University life thoughts – and so Sirohi makes it there to a standard view – that education is what is called Kierkegaardian life – and it is with in fact all its music. He means see it this way, the whole New York thing is about Berkeley in fact, or college life and say a deparment store and public transport and cars. We thank him – we get it.
